DANIEL PINO

Homestead, FL | 786-926-0720 | pinoponedaniel@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL PROFILE

Computer Science graduate (Magna Cum Laude, 3.8 GPA) with hands-on experience across Android development (Kotlin, Jetpack Compose, MVVM, Coroutines/Flow), full-stack web development (Python, FastAPI, React, TypeScript), and systems programming (C, C++). Built and shipped four independent applications end-to-end, including two Android apps and a full-stack web platform with authentication and automated testing. Comfortable working across the stack, from UI to background processing to REST API design.

KEY SKILLS

- **Languages:** Kotlin, Python, TypeScript, C, C++, Java, SQL
- **Frameworks & Tools:** Jetpack Compose, MVVM, Coroutines & Flow, Gradle, Room/SQLite, WorkManager, Ktor, PostgreSQL, FastAPI, React, Firebase, Git, Claude Code
- **Other:** REST API design (OpenAPI, JWT/OAuth2), object-oriented design, Agile/collaborative dev practices; fluent in English and Spanish

EDUCATION

Bachelor of Science in Computer Science **August 2026**

Florida International University — Miami, FL — Magna Cum Laude, GPA: 3.8

Dean's List (6 consecutive terms) | Coursework: Data Structures, Databases, Operating Systems, Blockchain Fundamentals

- **Academic Achievement Award** — Knight Foundation School of Computing & Information Sciences, FIU Tech Talent Academy (2026); recognized for outstanding academic performance among top students in the program.

PROJECTS

Tadu | *Kotlin, Jetpack Compose, WorkManager* | GitHub

- Developed an Android task management app with Firebase Authentication/Cloud Storage for secure, synced data, persistent local storage via Room, and a scheduled-notification reminder system (AlarmManager, BroadcastReceiver).

TreasuredWord | *Kotlin, Jetpack Compose, Ktor, PostgreSQL, JWT* | GitHub

- Built an Android Bible reader with offline translations and full-text search; added a Ktor backend (PostgreSQL, JWT refresh auth, Flyway, rate limiting) for cross-device sync, deployed via Docker on Render with CI.

BiblioTech | *Python, FastAPI, MySQL, React, TypeScript, JWT* | GitHub

- Built a full-stack technical bookstore application with a FastAPI + MySQL REST API (auto-generated OpenAPI docs) and a React/TypeScript frontend, implementing JWT authentication and role-based authorization.
- Shipped catalog search, ratings/comments, a shopping cart, and wishlists, backed by Alembic-versioned migrations, a 27-test pytest suite, Docker Compose, and GitHub Actions CI.

FastFinder | *Kotlin, File I/O, Coroutines, SQLite/Room* | GitHub

- Built a Windows file/folder search app in Kotlin that indexes local storage in the background, then supports incremental updates and filtered directory search — with concurrent search during indexing.

PROFESSIONAL EXPERIENCE

Programming Tutor **Nov 2024 – Present**

Miami Dade College | Homestead, FL

- Tutor 12+ students weekly, 1-on-1 and in small groups, on programming fundamentals, algorithms, data structures, OOP, and debugging.
- Design and deliver hands-on programming workshops, translating abstract CS concepts into practical exercises for students at varying skill levels.
- Build rapport with students by breaking down complex technical topics clearly, contributing to improved grades and higher course engagement.

AI Trainer (Remote) **Sep 2023 – Aug 2024**

Remotask & DataAnnotation | Remote

- Debugged and corrected AI-generated code across 500+ tasks, writing improved solutions used to fine-tune model performance on code-generation tasks.
- Evaluated multiple AI response variants and engineered targeted prompts to test model reasoning, selecting optimal outputs and delivering technical feedback that measurably improved code quality.
