

DANIEL PINO

Homestead, FL | 786-926-0720 | pinoponedaniel@gmail.com | github.com/Daniel-Pino-2000 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Computer Science graduate (Magna Cum Laude, 3.8 GPA) with hands-on experience across Android development (Kotlin, Jetpack Compose, MVVM, Coroutines/Flow), full-stack web development (Python, FastAPI, React, TypeScript), and systems programming (C, C++). Built and shipped four independent applications end-to-end, including two Android apps and a full-stack web platform with authentication and automated testing. Comfortable working across the stack, from UI to background processing to REST API design.

KEY SKILLS

- **Languages:** Kotlin, Python, TypeScript, C, C++, Java, SQL
- **Frameworks & Tools:** Jetpack Compose, MVVM, Coroutines & Flow, Gradle, Room/SQLite, WorkManager, Ktor, FastAPI, React, Firebase, Git, Claude Code
- **Other:** REST API design (OpenAPI, JWT/OAuth2), Object-oriented design, Agile/collaborative dev practices, fluent in English and Spanish

EDUCATION

Bachelor of Science in Computer Science

August 2026

Florida International University — Miami, FL — Magna Cum Laude

GPA: 3.8

Dean's List (6 consecutive terms) | Coursework: Data Structures, Databases, Operating Systems, Blockchain Fundamentals

HONORS & AWARDS

- **Academic Achievement Award** — Knight Foundation School of Computing & Information Sciences, FIU Tech Talent Academy (2026); recognized for outstanding academic performance among top students in the program.

PROJECTS

Tadu | Kotlin, Jetpack Compose, Firebase, Room ([GitHub](#))

- Developed an Android task management application using Kotlin and Jetpack Compose, integrating Firebase Authentication and Cloud Storage for secure, synced user data.
- Implemented persistent local storage with the Room Persistence Library and built a task reminder system using AlarmManager and BroadcastReceiver for scheduled notifications.

BibleApp | Kotlin, Jetpack Compose, MVVM, Coroutines, SQLite/Room ([GitHub](#))

- Built an Android Bible reader (Kotlin, Jetpack Compose, MVVM) with offline translations via a REST API, full-text search, footnotes, and poem/heading formatting.
- Designed a repository layer decoupling the UI from SQLite and a swappable remote source; fixed a coroutine/SQLite threading bug. Now building a Ktor + Postgres backend for account sync.

BiblioTech | Python, FastAPI, MySQL, React, TypeScript, JWT ([GitHub](#))

- Built a full-stack technical bookstore application with a FastAPI + MySQL REST API (auto-generated OpenAPI docs) and a React/TypeScript frontend, implementing JWT authentication and role-based authorization.
- Shipped catalog search, ratings/comments, a shopping cart, and wishlists, backed by Alembic-versioned migrations, a 27-test pytest suite, Docker Compose, and GitHub Actions CI.

FastFinder | Kotlin, Compose Desktop, Apache Lucene, Coroutines ([GitHub](#))

- Built a Windows desktop app (Kotlin, Compose Desktop) indexing storage via a parallel fork-join Lucene walk (~2x speedup), with crash-safe swaps and NTFS USN Journal incremental updates.

PROFESSIONAL EXPERIENCE

Programming Tutor

November 2024 – Present

Miami Dade College — Homestead, FL

- Tutor 12+ students weekly, 1-on-1 and in small groups, on programming fundamentals, algorithms, data structures, OOP, and debugging.
- Design and deliver hands-on programming workshops, translating abstract CS concepts into practical exercises for students at varying skill levels.
- Build rapport with students by breaking down complex technical topics clearly, contributing to improved grades and higher course engagement.

AI Trainer (Remote)

September 2023 – August 2024

Remotask & DataAnnotation — Remote

- Debugged and corrected AI-generated code across 500+ tasks, writing improved solutions used to fine-tune model performance on code-generation tasks.
- Evaluated multiple AI response variants and engineered targeted prompts to test model reasoning, selecting optimal outputs and delivering technical feedback that measurably improved code quality.
