

DANIEL PINO

Homestead, FL | 786-926-0720 | pinoponedaniel@gmail.com | github.com/Daniel-Pino-2000 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Computer Science graduate with hands-on experience across Android development (Kotlin, Jetpack Compose), systems and scripting (C, C++, Python), and applied AI/data work. Built and shipped four independent applications spanning task management, file search, cloud file-sharing, and game development. Comfortable working across the stack, from UI to background processing to API integration.

KEY SKILLS

- **Languages:** Kotlin, Python, C, C++, Java, SQL
- **Frameworks & Tools:** Jetpack Compose, Git, Firebase, WorkManager, Ktor, Google Drive API, Pygame, SQLite/Room, Claude Code
- **Other:** Object-oriented design, REST API integration, Agile/collaborative dev practices, fluent in English and Spanish

EDUCATION

Bachelor of Science in Computer Science

Florida International University — Miami, FL

July 2026

GPA: 3.8

HONORS & AWARDS

- **Academic Achievement Award** — Knight Foundation School of Computing & Information Sciences, FIU Tech Talent Academy (2026); recognized for outstanding academic performance among top students in the program.

PROJECTS

Tadu | Kotlin, Jetpack Compose, WorkManager ([GitHub](#))

- Developed an Android task management application using Kotlin and Jetpack Compose, integrating Firebase Authentication and Cloud Storage for secure, synced user data.
- Implemented persistent local storage with the Room Persistence Library and built a task reminder system using AlarmManager and BroadcastReceiver for scheduled notifications.

FastFinder | Kotlin, File I/O, Coroutines, SQLite/Room ([GitHub](#))

- Built a Windows file and folder search application in Kotlin that indexes local storage in the background on first run, then supports incremental database updates and custom directory search with advanced filtering by file type and size — all while allowing concurrent search during indexing.

FileSharingApp | Python, Google Drive API ([GitHub](#))

- Developed a Python file-sharing application integrated with the Google Drive API, supporting OAuth authentication, batch upload/download of multiple files and folders, real-time progress tracking, and full folder navigation.

Minesweeper | Python, Pygame ([GitHub](#))

- Developed a fully playable Minesweeper clone with an interactive GUI, custom board generation, and multiple configurable difficulty levels.

PROFESSIONAL EXPERIENCE

Programming Tutor

Miami Dade College — Homestead, FL

November 2024 – Present

- Tutor 12+ students weekly, 1-on-1 and in small groups, on programming fundamentals, algorithms, data structures, OOP, and debugging.
- Design and deliver hands-on programming workshops, translating abstract CS concepts into practical exercises for students at varying skill levels.
- Build rapport with students by breaking down complex technical topics clearly, contributing to improved grades and higher course engagement.

AI Trainer (Remote)

Remotask & DataAnnotation — Remote

March 2024 – August 2024

- Annotated and reviewed 500+ tasks across datasets to improve NLP and code-generation model performance, evaluating outputs for accuracy and reliability.
- Provided structured technical feedback on model responses, contributing to measurable improvements in output quality for programming-related tasks.
